## INFORMATION TECHNOLOGY

### WIKIPEDIA AT YOUR FINGERTIPS

Did you know you can have Wikipedia - the all inclusive, all knowing, unofficial central source of all information on the internet - on your own pc? \* Neither did we. Just imagine how handy this could be next time your internet connection drops for the umpteenth time and you'll still have your own local version of Wikipedia available. Hadlee Simons from [iafrica's](#) cooltech has all the information you need.

Image type unknown

\* Never heard of Wikipedia? [Wikipedia](#) ([listen](#) [/wɪˈkɪpiːdi.ə/](#) or [listen](#) [/wɪˈkɪpiː.ə/](#) [wik-i-pee-dee](#)?) is a free,

collaboratively edited, and multilingual Internet encyclopedia supported by the non-profit [Wikimedia Foundation](#). Its 22 million articles (over 4 million in English alone) have been written collaboratively by volunteers around the world. Almost all of its articles can be edited by anyone with access to the site, and it has about 100,000 regularly active contributors. As of August 2012, there are editions of Wikipedia in 285 languages. It has become the largest and most popular general reference work on the Internet, ranking sixth globally among all websites on Alexa and having an estimated 365 million readers worldwide. Wikipedia was launched in January 2001 by Jimmy Wales and Larry Sanger. Sanger coined the name [Wikipedia](#), which is a [portmanteau](#) of [wiki](#) (a type of collaborative website, from the Hawaiian word wiki, meaning "quick") and encyclopedia. (SOURCE: WIKIPEDIA of course!)
