SAFECOM: 3 THINGS TO REMEMBER

Safecom printing system, a centralised print management system with accounting

ation were the ease of use, lower paper usage and reducing overall costs. s secure pull printing with access control and full encryption, enable staff and o reduces waste. More detailed instructions can be found on [FIRGA's website](#).

en you use a Safecom printer:

ive to sign off.

he else can use your print credits.

printer for an hour after which it is released. If you don't immediately print and go g off at the first one, your credits will remain reserved and it could indicate that you means that a person can only print at one printer at a time.

ow many credits your printing will cost. If you start printing and you run out of

Select the correct colour option

Before you print, choose the appropriate colour option in the print interface on your PC. If the default is colour, it will cost substantially more. ([price per page is listed on our Service Catalogue](#))
