REMINDER TO ENROL FOR MFA

Last month we told you about the planned implementation of MFA (Multi-factor Authentication). Thank you to the 28 671 staff and students who have already enrolled to use MFA..

If you are still unsure what MFA entails, [here is some information](#)

*Although we have not activated MFA yet, soon all staff and students **will be required to use multi factor authentication when using any of the Microsoft 365 applications (Outlook, Sharepoint Online, OneDrive for Business, etc.) to protect their information university's network.** If you haven't enrolled yet, we strongly advise you do so as soon possible by [following these steps](#).*

If you have any questions [first consult our FAQs](#) and if this does not answer your question, please log your request on our [ICT Partner Portal](#) and a technician will contact you. If you have any questions you would like to add to our FAQs, you're welcome to send an email to help@sun.ac.za and we'll add them to the list.
