NEW IT BUILDING: WHAT IS A PLACE OF WORK?

Our fairly intensive participation in the design process for the new IT building got me thinking about what a place of work is and why a knowledge building is essentially an office building: it will not house technical staff, system administrators, etc. It is a place of work for the division's engineers, managers, etc.

Besides the admittedly rainwater harvesting, but sustainable than other change in the culture of require that all new offices the past 25 years in which this is a radical departure at least is simply related

arden, optimal orientation, solar PV panels, will make it far more energy-efficient and presents is the opportunity to influence could be the university's new norms that s become accustomed to being housed for offices leading off dark, desolate corridors, about our "open plan" future, some of which 1. [\(more...\)](#)
