

# International conference on aggregate litigation – current challenges for civil justice in the global perspective

The conference will consider a variety of current challenges in aggregate litigation around the world (funding, privatization of dispute resolution, judicial case management). Class actions will be the main focus, but discussions will pertain to civil justice systems - as complex systems of judicial and out-of-court mechanisms for resolving disputes and providing justice - in general.

**24-25 June 2025**

**Venue: STIAS (Stellenbosch  
Institute for Advanced Study)**

**RSVP by 15 February 2025**
