

Fifty Years of Invasion Ecology

The Legacy of Charles Elton

*Edited By: David M. Richardson,
Deputy Director: Science Strategy,
Centre of Excellence for Invasion Biology,
Stellenbosch University, South Africa*

This book brings together the insights of more than 50 authors to examine the origins, foundations, current dimensions and potential trajectories of invasion ecology.

It revisits key tenets of the foundations of invasion ecology, including contributions of pioneering naturalists of the 19th century, such as Charles Darwin and British ecologist Charles Elton, whose 1958 monograph on invasive species is widely acknowledged as having focussed scientific attention on biological invasions.
