

## WHEREVER YOU ROAM, EDUROAM

Posted on **May 04,2017** by **IT Communications**

*eduroam* (education roaming) is the secure, world-wide roaming access service developed for the international research and education community.

Users can move between campuses and visit other participating institutions at home or abroad and get instant, secure network access without having to arrange and use guest accounts or extra passwords. The visiting user is authenticated using the same identity (username and password) they use at their home institution, the institution or organisation they are affiliated with.

Visiting dignitaries who subscribe to eduroam will be able to connect to all wireless access points across campus.

More information on how to use eduroam and where to find more information can be found in our [service catalogue](#). Also consult the eduroam websites at [www.eduroam.org](http://www.eduroam.org) and <http://eduroam.ac.za>.
