# How to set up Microsoft Authenticator

NOTE: Only users who are allowed for the Authenticator app push notifications and don't have it currently set up will see the prompt.

To install it, you must select Next on the prompt, which will take you through the Authenticator app setup as shown below.
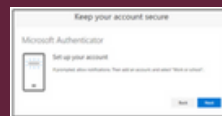

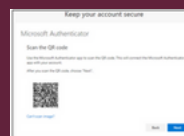

**1** Tap Next.

2 Download the app.

**3** See how to set up the Authenticator app.

4 Scan the QR Code.

5 Approve the test notification.

6 Notification approved.

7 Authenticator app is now successfully set up as the user's default sign-in method.
